Executive Summary

This document provides a comprehensive analysis of **camelsnus.com**, a consumer-facing brand website for Camel SNUS smokeless tobacco products operated by R.J. Reynolds Tobacco Company. The site is built on **Adobe Experience Manager (AEM) as a Cloud Service** and is a gated, authenticated experience requiring 21+ age verification.

Compared to its sibling sites (camel.com, americanspirit.com), camelsnus.com is notably **smaller and more focused**, with approximately 20 pages, 8 template types, and a narrower product range (6 SNUS varieties). The analysis covers six key deliverables: template inventory, block/component catalog, page counts, integrations analysis, complex use cases, and migration estimates for moving to Adobe Edge Delivery Services.

5. Complex Use Cases & Observations

5.1 Authentication & Age Gating

Complexity: HIGH | **Instances:** All pages | **Where:** Site-wide

- Multi-step age verification requiring personal information (DOB, last 4 SSN)
 - Cross-brand SSO via VIA (Verified Identity Alliance) across RAI properties
 - Session management with Service Worker for offline/caching
 - All content behind `/secure/` path requires authentication
 - Federal and state tobacco regulations require strict age gating
 - **Why complex:** Authentication architecture must be replicated or replaced in EDS; involves Brand Site API, SSO/VIA, and session management
-

5.2 Multi-Factor Authentication (MFA) for Profile

Complexity: HIGH | **Instances:** 1 page | **Where:** `/secure/my-profile.html`

- One-time passcode sent to registered email
 - Passcode entry form with validation
 - State selection dropdown pre-populated from profile data
 - Profile management behind additional auth layer
 - **Why complex:** Requires secure server-side passcode generation/validation; cannot be implemented purely client-side in EDS
-

5.3 Interactive Content Hub (“Don’t Click This”)

Complexity: HIGH | **Instances:** 1 hub + 3+ detail pages | **Where:** `/secure/dont-click-this.html`

- Social-feed-style content cards with like/comment counters
 - Category filter tabs (All, Fake or Real Quiz, Real Meter, Plot Twist)
 - Load more pagination for infinite scroll
 - Individual content detail pages with full comment system
 - Comment submission with 140-character limit, user identification (name + location)
 - Like/reply functionality on community comments
 - Contest/sweepstakes integration (\$50 gift card prizes)
 - “Plot Twist Hall of Fame” gallery page
 - **Why complex:** Requires custom API for user-generated content (comments, likes), real-time social interactions, contest mechanics, content moderation
-

5.4 Personalized Coupon System

Complexity: HIGH | **Instances:** 1 page | **Where:** `/secure/coupons.html`

- Personalized greeting with user’s first name
 - Dynamic coupon value display (\$3/\$4 off offers)
 - “Redeem Now” CTA with retailer-specific redemption
 - Claimed savings tracker (year-to-date)
-

- Barcode generation for in-store redemption
- 5-minute coupon expiration timer at register
- Notification badge count in header showing available coupons
- **Why complex:** Requires Brand Site API integration for personalized offers, barcode generation, retailer integration, real-time expiration logic

5.5 Store Finder with Product Availability

Complexity: MEDIUM | **Instances:** 1 page | **Where:** `/secure/store-finder.html`

- Google Maps API with geolocation
- Zip code-based store search
- Numbered store markers matching results list
- Expandable "Product List" per store (SNUS product availability)
- Distance calculation and "Get Directions" links
- **Why complex:** Google Maps integration, geolocation permissions, store inventory data via API

5.6 Regulatory Compliance (Smokeless Tobacco)

Complexity: MEDIUM | **Instances:** All pages | **Where:** Site-wide

- "WARNING: This product can cause mouth cancer." on every page (different from Surgeon General's warning on cigarette sites)
- "SNUS" product category label (required)
- State-specific product availability notices
- Age verification compliance (21+)
- SMS/text message consent management (TCPA compliance)
- Contest/sweepstakes "No purchase necessary" and "Void where prohibited" legal requirements
- **Why complex:** Different warning text from cigarette sites; must ensure correct regulatory compliance per product category

5.7 Comment/UGC Moderation System

Complexity: MEDIUM | **Instances:** 3+ pages | **Where:** `/secure/dont-click-this/*`

- User-generated comments with name and location display
- Like counts and reply functionality
- "Submission Guidelines" link for content policy
- Content moderation workflow (pre/post moderation)
- **Why complex:** Requires backend moderation system, possibly human review for tobacco brand compliance; UGC on regulated product sites has additional legal considerations
