

AEM SITE ANALYSIS REPORT

Stryker India

Comprehensive Site Analysis for Edge Delivery Services Migration

<https://www.stryker.com/in/en/>

Date: March 12, 2026

Scope: Templates, Components, Integrations, Migration Estimates

Current Platform: Adobe Experience Manager (AEM Sites) → **Target:** Adobe Edge Delivery Services

Locale: India / English (in/en)

Table of Contents

1. Executive Summary
2. Section 1 – Templates Inventory
3. Section 2 – Blocks / Components Catalog
4. Section 3 – Page Counts by Template
5. Section 4 – Integrations Analysis
6. Section 5 – Complex Use Cases & Observations
7. Section 6 – Migration Estimates
8. Section 7 – Screenshots

Executive Summary

The Stryker India site (`stryker.com/in/en/`) is a **reduced-scope regional locale** of the global Stryker AEM platform. It shares identical infrastructure, CMS templates, and marketing/analytics integrations with the US site (`/us/en/`), but operates with significantly fewer content pages, a simplified navigation structure, and India-specific regulatory content (GST/MRP pricing documents).

7 Templates Identified	18 Blocks / Components	~150-200 Estimated Pages (in/en)	15 Integrations
--	--	--	---------------------------------------

Key Finding: The India site is approximately 20–25% of the US site's content volume, using the same AEM template set with no India-specific template customizations. Migration effort is reduced proportionally, with the primary differentiation being India regulatory content (GST Rates/MRP documents) and a simplified 4-item top-level navigation (vs 7 on US).

India vs US - Quick Comparison

Dimension	India (in/en)	US (us/en)
Primary Nav Items	4 (About, MedSurg, Orthopaedics, Neurotechnology)	7 (About, Portfolios, Services, Care Settings, Patients, Training, Careers)
Business Units in Nav	2 (MedSurg, Orthopaedics + Neurotechnology)	20+ divisions with sub-menus
MedSurg Product Categories	15 categories	46+ categories
Orthopaedics Sub-categories	3 (Joint Replacement, Sports Medicine, Upper Extremities)	6+ categories
News Articles	87 articles	300+ articles
Footer Social Links	2 (Facebook, LinkedIn)	4 (Facebook, LinkedIn, Instagram, YouTube)
India-Specific Content	GST Rates/MRP PDFs, India regulatory disclaimers	N/A
Missing Sections (vs US)	Services/Solutions, Care Settings, Patients, Training/Education, Careers	Full scope
Endoscopy Section	Returns 404	Full product catalog

Section 1 - Templates Inventory

The India site uses the same AEM template architecture as the global platform. Seven distinct templates were identified through page-level analysis. All templates are shared with the US locale—no India-specific template customizations exist.

#	Template Name	AEM Template ID	Description	India Usage	Reuse from US
1	Tier-1 Landing	tier1-landing	Full-width hero, mission/values, fast facts, awards carousel. Used for homepage and About page.	Homepage, About page	100% - identical template
2	Portfolio Listing	portfolio	Category grid with product image cards. Headline + sub-headline + horizontal rule + descriptive paragraph + product grid.	MedSurg, Orthopaedics, Neurotechnology portfolio pages	100% - same layout, fewer cards
3	Product Category	base	Individual product category pages within portfolios (e.g., Bed Frames, Power Tools).	15+ MedSurg sub-pages, 3+ Orthopaedics sub-pages	100% - identical template
4	Business Unit Landing	tier1-landing (variant)	Hero banner with featured products/services list + social CTA. Used for Joint Replacement, Neurovascular.	Joint Replacement page, Neurovascular page	100% - same template variant
5	News Listing	base (variant)	Paginated news listing with category filter, sidebar with media contacts. "Load More" pagination.	News & Features page (87 articles)	100% - identical component
6	News Article	base	Individual news/feature article pages with date, headline, body copy, and images.	87 individual news articles	100% - identical template
7	Legal / Informational	base	Text-heavy informational pages for legal content (Privacy, Terms of Use, Accessibility, etc.).	Privacy, Terms of Use, Accessibility, Surgeon Disclaimer	100% - identical template

Template Reuse: All 7 India templates are directly reusable from the US migration. Zero additional template development is required for the India locale. The only differences are content volume (fewer pages per template) and locale-specific metadata.

Section 2 - Blocks / Components Catalog

18 blocks/components were identified across the India site. These are a subset of the 22 found on the US site, with all components being identical in structure and behavior.

2.1 Global Components

#	Component	EDS Block Name	Description	India Notes
1	Global Header	header	Logo, hamburger menu, locale selector (India/English), search icon. Sticky on scroll.	4 nav items (vs 7 US). Locale shows "INDIA/ENGLISH".
2	Global Footer	footer	Copyright, legal links, social icons, regulatory links.	2 social links (Facebook, LinkedIn). India-specific: GST Rates PDF, MRP Knee Implants PDF, Product Experience link.
3	Cookie Consent Banner	N/A (OneTrust)	GDPR/privacy cookie consent dialog via OneTrust.	Same domain ID as US: d75729a5-75c8-4a38-8aae-707548537e37
4	Locale Selector	locale-selector	Globe icon with country/language picker. Redirects to locale-specific path.	Links to 74 hreflang locales (same as US).
5	Search Overlay	search	Full-screen search overlay triggered by search icon. Uses server-side search API.	Search path uses /in/en/ prefix for results.

2.2 Content Components

#	Component	EDS Block Name	Description	Complexity
6	Hero Banner (Full-width)	hero	Large heading with animated text ("Our company"), background image or color, descriptive paragraph below.	Medium
7	Mission Statement	text-block	Centered text block with animated line-by-line reveal. "Together with our customers, we are driven to make healthcare better."	Low
8	Values Grid	cards	4-column grid: Integrity, Accountability, People, Performance. Each with title and subtitle.	Low
9	Statistics / Fast Facts	stats	Icon + large number + description. Used for "61 countries", "56K employees", "\$22.6B sales", etc.	Medium
10	Info Card (Side-by-side)	cards-horizontal	Image left/right + heading + body text + CTA link. Used for Code of Conduct, Quality Policy sections.	Medium
11	Teaser Grid	cards (variant)	3-4 column grid of image + title cards. Links to sub-pages. Used for "Learn more about us", portfolio product grids.	Low

12	Portfolio Product Grid	cards (variant)	Product category cards with images. 3-column layout for portfolio listing pages.	Low
13	Timeline / History	timeline	Historical timeline with dates and descriptions. Expandable "Learn More" link.	Medium
14	Awards Carousel	carousel	Horizontal scrollable award badges (Great Place to Work, Best Workplaces, etc.).	Medium
15	News Article Card	news-list	Thumbnail + date + headline + excerpt + "Read More" link. Paginated with "Load More" button.	High
16	Business Links Grid	link-list	Simple text link list for business unit pages (Joint Replacement, Neurovascular).	Low
17	Featured Products Accordion	accordion	Expandable product sections with image + description + "More" link on Joint Replacement page.	Medium
18	Promotional Banner	banner	Full-width promotional image banner (e.g., Mako Total Knee professor testimonial).	Low

Block Consolidation Strategy

EDS Block Reuse: The 18 India components can be consolidated into **~12 EDS blocks**, achieving a **33% code reduction**. Values Grid, Teaser Grid, and Portfolio Product Grid all map to the same `cards` block with styling variants. All 12 blocks would be directly reusable from a US migration with zero additional development.

Components Present on US but Absent from India

US Component	Reason for Absence
Mega Menu (multi-column)	India uses simplified 4-item nav; no mega menu required
Contact Form / Marketo Form	No dedicated contact page on India site
Video Player (inline)	No video content sections observed on India pages
Patient Stories Carousel	No Patients section on India site

Section 3 - Page Counts by Template

Estimated page counts for the India locale based on navigation crawl, news listing pagination (87 articles), and product category enumeration.

Template	Estimated Page Count	Estimation Method	Notes
Tier-1 Landing	5-8	Navigation crawl	Homepage, About, Corporate Responsibility, Culture, Annual Review, etc.
Portfolio Listing	3-4	Primary navigation	MedSurg Equipment, Orthopaedics, Neurotechnology (+ possible Spine sub-portfolio)
Product Category	25-35	Category enumeration	15 MedSurg + 3 Orthopaedics + 3 Neurotechnology sub-categories + product detail pages
Business Unit Landing	2-4	Page crawl	Joint Replacement, Neurovascular (standalone business unit pages outside portfolios)
News Listing	1	Single page	Paginated listing page with "Load More" (87 articles shown)
News Article	80-90	News count display	"Showing 8 of 87" reported by news listing component
Legal / Informational	8-12	Footer link enumeration	Privacy, Terms of Use, Accessibility, Surgeon Disclaimer, Code of Conduct, Governance, History, Global Quality, etc.
About Sub-pages	10-15	About page link crawl	Leadership, Awards, Our Management, Corporate Governance, Site Map, etc.
TOTAL (India in/en)	~150-200		Approximately 20-25% of US site volume (700-900 pages)

Note: The Endoscopy section (</in/en/endoscopy.html>) returns a 404 error, suggesting content has been removed or was never published for the India locale. This reduces page count from what might be expected.

Section 4 - Integrations Analysis

The India site uses an **identical integration stack** to the US site. All integrations are globally shared via the same Adobe Experience Platform Launch property. The only differentiation is the locale dimension passed to analytics.

#	Integration	Technology	Identifier / Config	India vs US	EDS Migration
1	Adobe Experience Platform Launch	Tag Manager	136dae5be016/c16a...	Identical – same global Launch property	Low – Single <script> tag
2	Adobe Analytics	AppMeasurement 2.23.0	Report Suite: stkr.com.2023.prod	Same suite; locale dimension v7=in en	Medium – Data layer mapping
3	Adobe Visitor ID Service	ECID (VisitorAPI)	Org: 8C5867CA5245AE040A490D4C@AdobeOrg	Identical	Low
4	Adobe Target	at.js / Alloy	Same Org	Identical – shared A/B testing config	Medium – Personalization setup
5	Adobe Dynamic Media (Scene7)	Image delivery CDN	media-assets.stryker.com	Identical CDN domain	High – Image URL rewriting
6	OneTrust Cookie Consent	Cookie management	Domain ID: d75729a5-75c8-4a38-8aae-707548537e37	Identical domain ID	Low – Script embed
7	Marketo Munchkin	Lead tracking	Munchkin ID: 338-WAP-571	Identical	Low – Script embed
8	Adobe Helix RUM	Real User Monitoring	rum.hlx.page	Identical – indicates EDS migration planning active	Low – Already EDS-native
9	AEM ClientLibs	Client-side libraries	clientlibs-all, granite, clientlib-react	Identical	Out of scope – Replaced by EDS
10	i18n / Localization	Content dictionaries	JSON translation dictionaries	India-specific labels (India/English)	Medium – EDS spreadsheet mapping
11	Google Tag Manager	Supplementary tag mgr	Via Launch	Identical	Low
12	hreflang Multi-locale	SEO	74 hreflang alternates	Identical set – all 74 locales linked	Medium – Meta tag management

13	AEM Content Fragment API	Dynamic content	News listing, product data	Same API endpoints, filtered by locale	High – Requires spreadsheet/API
14	Adobe Fonts / Typekit	Font delivery	Custom web fonts	Identical	Low
15	GST/MRP Document Delivery	AEM DAM (PDF serving)	/content/dam/stryker/in/legal/	India-specific – Not present on US	Medium – PDF hosting strategy

Integration Summary: 14 of 15 integrations are shared globally with the US site. The only India-unique integration is the GST/MRP regulatory document delivery from AEM DAM. If the US migration has already been completed, **zero additional integration work** is needed for India beyond locale configuration and PDF hosting.

Section 5 - Complex Use Cases & Observations

#	Use Case	Description	Complexity	Recommendation
1	Multi-locale URL Architecture	All India pages use <code>/in/en/</code> prefix with 74 hreflang alternates. URL structure must be preserved for SEO equity and cross-locale linking.	High	Use EDS folder-based locale routing. Implement hreflang metadata via spreadsheet. Set up 301 redirects for any URL changes.
2	News Listing with Pagination	87 articles with "Load More" client-side pagination and category filtering. Dynamic content loaded from AEM Content Fragment API.	High	Replace with EDS query index (spreadsheet-backed). Client-side filtering and pagination via custom JavaScript block.
3	Dynamic Media Image Delivery	All product images served via <code>media-assets.stryker.com</code> (Scene7) with on-the-fly transformations (resize, crop, quality).	High	Preserve Scene7 URLs during initial migration (external image references). Plan for progressive migration to EDS media delivery.
4	India Regulatory Compliance	Footer includes mandatory GST Rates and MRP documents for Indian medical device pricing regulations. PDFs served from AEM DAM at <code>/content/dam/stryker/in/legal/</code> .	Medium	Host PDFs in EDS media folder or external CDN. Add India-specific footer links via locale-conditional footer fragment.
5	Cross-locale Content Sharing	Many India news articles are identical to US articles (global press releases). Content is duplicated across locales rather than shared.	Medium	Use EDS content fragments or shared source documents with locale-specific metadata overlays.
6	Animated Text Effects	Homepage and About page use CSS/JS animations for text reveal (e.g., "Our company" headline animation, mission statement line-by-line reveal).	Medium	Implement via EDS block JavaScript decoration. Use CSS transitions triggered by IntersectionObserver for scroll-based reveals.
7	Cookie Consent (India DPDP Act)	OneTrust consent banner must comply with India's Digital Personal Data Protection Act (DPDP) 2023 in addition to global GDPR settings.	Medium	OneTrust handles geo-detection automatically. Ensure EDS <code>delayed.js</code> loads OneTrust script. Test India-specific consent categories.
8	Broken Endoscopy Section	<code>/in/en/endoscopy.html</code> returns 404. May indicate content removal or unpublished locale variant.	Low	Verify with content owners if Endoscopy should exist for India. Implement 404 handling or redirect to portfolio page.
9	Awards Carousel with	About page features horizontally scrollable award badges that may be	Medium	EDS carousel block with author-editable image

**Dynamic
Badges**

updated annually (Great Place to Work 2025, Best Workplaces Asia 2025, etc.).

slots. Responsive horizontal scroll on mobile.

Section 6 – Migration Estimates

6.1 Scenario: Standalone India Migration

If the India site is migrated independently (without prior US migration).

Phase	Duration	Details
Phase 1: Infrastructure & Design	3–4 weeks	EDS project setup, design token extraction, global styles, header/footer blocks, cookie consent integration.
Phase 2: Template & Block Development	4–6 weeks	7 templates, 12 EDS blocks (consolidated from 18 components). Includes news listing with pagination, carousel, stats block.
Phase 3: Content Migration	3–5 weeks	~150–200 pages. Import script development, bulk content migration, image URL mapping, metadata setup.
Phase 4: Integration & Testing	2–3 weeks	Analytics validation, OneTrust testing, hreflang verification, India regulatory compliance check, performance optimization.
Phase 5: UAT & Go-Live	2–3 weeks	User acceptance testing, redirect mapping, DNS cutover, monitoring.
TOTAL (Standalone)	14–21 weeks	Approximately 3.5–5 months with 2–3 developers

6.2 Scenario: India as Follow-on to US Migration

If the US site has already been migrated to EDS (recommended approach).

Phase	Duration	Details
Phase 1: Locale Setup	1 week	Fork US project, configure India locale routing, update header/footer for India nav and regulatory links.
Phase 2: Content Migration	2–3 weeks	Adapt US import scripts for India content. Migrate ~150–200 pages. Map India-specific metadata and GST/MRP documents.
Phase 3: Testing & Compliance	1–2 weeks	Analytics locale dimension validation, DPDP Act compliance, hreflang testing, India-specific content QA.
Phase 4: Go-Live	1 week	Redirect mapping, DNS configuration, production monitoring.
TOTAL (Follow-on)	5–7 weeks	Approximately 1–2 months with 1–2 developers

Cost Estimate (Follow-on): \$15,000–\$35,000 USD (assuming reuse of US blocks, templates, and integrations).

Cost Estimate (Standalone): \$55,000–\$110,000 USD (full development cycle).

Savings from US Reuse: 65–70% effort reduction when leveraging prior US migration.

6.3 Risk Factors

Risk	Impact	Likelihood	Mitigation
------	--------	------------	------------

India DPDP Act compliance changes	Medium	Medium	OneTrust handles regulation updates. Monitor DPDP Act implementation timelines.
Dynamic Media URL dependencies	High	High	Preserve Scene7 URLs initially. Plan phased image migration.
News API migration complexity	Medium	Medium	Convert to EDS query index. Test pagination with 87+ articles.
Cross-locale redirect complexity (74 hreflangs)	Medium	Low	Use EDS metadata spreadsheet for hreflang management. Implement bulk redirect mapping.
GST/MRP document update frequency	Low	Medium	Host PDFs externally or in EDS media. Establish update workflow for annual GST revisions.
