Executive Summary

VELO.com/us is a **consumer-facing, age-gated nicotine pouch brand website** built on Adobe Experience Manager (AEM Sites). The site serves as a product showcase, loyalty rewards platform, and engagement hub for adult nicotine consumers (21+). It features a heavy MarTech stack (25+ ad-tech/analytics vendors), a Loyalty Plus rewards program with gamification, Google Maps store locator, and social engagement features (polls, comments, likes).

10	24	~45-60	25+
Page Templates	Blocks / Components	Estimated Total Pages	Integrations

Key Findings: The site is **relatively small in page count** (~45-60 pages) but **high in interactive complexity**. Major challenges include: age-gated authentication (all content under `/secure/`), loyalty/rewards program integration, gamification engine (polls, points, social engagement), Google Maps store locator, 25+ ad-tech integrations, and MFA-protected profile management.

Site Architecture Overview

Dimension	Details
CMS Platform	Adobe Experience Manager (AEM Sites) — <code>/etc.clientlibs/velo/</code> , <code>/etc.clientlibs/reynoldsamerican-aem-base/</code>
Authentication	Age-gated login (21+). All authenticated content under <code>/us/secure/</code> . Public pages: login, registration, forgot password.
URL Structure	<code>/us/</code> (public) and <code>/us/secure/</code> (authenticated)
Brand Owner	Modoral Brands Inc. (subsidiary of R.J. Reynolds / British American Tobacco)
Loyalty Platform	Custom "Loyalty Plus" SDK integrated as AEM clientlib
API Backend	<code>usapi.VELO.com</code> (authentication, profile, offers, notifications)
Custom Fonts	Velo WWangle (Regular, Medium, Bold), IcoMoon icons, Font Awesome brands
Layout Shells	3 distinct layouts: (a) Full authenticated with header/footer/ticker, (b) Minimal dark-background shell for registration/legal, (c) Two-column sidebar for Terms of Use

Section 1 - Templates Inventory

10 distinct page templates were identified across the site, organized into 3 layout shells.

#	Template Name	Complexity	Description / Reasoning	Reference URL(s)
1	Homepage (Authenticated)	High	Full-width hero with seasonal promotion (St. Paddy's Day), rewards promo section with gold vault imagery, McLaren Racing partnership banner, product exploration CTA, newsletter signup, store locator teaser. Multiple animated/interactive sections.	velo.com/us/secure.html
2	Product Catalog	Medium	Product hero with branding, flavor grid (8-10 product cards each with image, name, strength, description), "Find a Store" CTA, product comparison section (Plus vs Standard), image carousel, reusable bottom modules.	products/velo-plus.html products/velo.html
3	Product Education / Landing	High	Animated hero with parallax, tabbed product switcher (VELO Plus / VELO), "How to Enjoy" carousel (5 slides), product comparison cards, multiple CTAs. Heavy animation and interactivity.	about.html
4	Content Hub / Gamification	High	Social media-style content feed with filter tabs (All/Poll/Video), content cards with points badges, like/comment counts, "Load More" pagination, Instagram cross-promo section. Highest interactive complexity.	experience-more.html
5	Gamification / Poll Detail	High	Interactive poll with radio options and images, comment system with character counter, user profile display (avatar, name, location), social engagement (likes/comments with counts), "You May Also Enjoy" carousel.	feelin-lucky.html
6	Store Locator	High	Google Maps embed with numbered markers, zip code search, geolocation, product filter, scrollable results list with "Get Directions" links, "Load More" pagination, product availability per store.	store-locator.html
7	Brand Partnership / Landing	Low	Simple two-section layout with large imagery. F1 hero section + IndyCar section. Primarily visual storytelling with minimal interactivity.	racing/2025.html

8	Form / Support	Medium	Contact form with topic dropdown, message textarea, submit button. Also includes chat button, phone click-to-call, and business hours display. Used for Contact Us, SMS signup, Rewards enrollment.	contact-us.html sms.html rewards-enroll.html
9	Legal / Informational (Standard)	Low	Long-form text with anchor TOC. Uses standard site header/footer chrome. Accordion variant for FAQ (33 items in 4 categories).	privacy-policy.html faq.html rewards-terms-and-conditions.html
10	Registration / Auth Flow	High	Minimal dark-background shell (no standard header/footer). Multi-step wizard (4 steps) with form validation, age verification, identity check, state selection. Also used for forgot-password, site-requirements, terms-of-use, text-messaging T&C.	registration.html forgot-password.html terms-of-use.html

Section 2 - Blocks / Components Catalog

24 blocks/components were identified. These are grouped into Global (present on all pages) and Content blocks.

2.1 Global Components

#	Block Name	Complexity	Description & Behaviour	Reference URL(s)
1	Nicotine Warning Banner	Low	Fixed top bar with yellow background. "WARNING: This product contains nicotine. Nicotine is an addictive chemical." + "UNDERAGE SALE PROHIBITED" / "NICOTINE PRODUCTS" labels. Persistent on all pages.	All pages
2	Promotional Ticker	Medium	Dismissible promotional bar below warning. Currently shows: "FEELIN' LUCKY? EARN +125 Points" with product image and "TAKE POLL" CTA. Dynamic content that changes seasonally. Includes close/dismiss button.	All authenticated pages
3	Global Header	High	VELO logo (links to /secure.html), hamburger menu button, "Join Rewards" CTA button, notification bell with dynamic badge count, slide-out notification center panel. Hamburger opens a full-screen mobile-style nav with expandable sub-menus.	All authenticated pages
4	Hamburger Navigation Menu	High	Full-screen slide-out navigation. Items: What Is Velo? (expandable → VELO, VELO Plus), Experience More, Sign Up For Texts, Offers, Profile, Store Finder. Expandable sub-menus with animation.	All authenticated pages
5	Notification Center	Medium	Slide-out panel triggered by bell icon. Shows "Available Coupons" count with link to offers page. Dynamic notification list. Badge count updates in real-time.	All authenticated pages
6	Safety Information Bar	Low	"Important Safety & Product Information" expandable/collapsible banner below header. Links to FAQ page. Contains product safety images.	All authenticated pages
7	Global Footer	Medium	VELO logo, two-tier navigation (primary: Products, Mobile Offers, Store Locator, McLaren Racing, Contact Us, FAQs, Logout; secondary: Tobacco Rights, Privacy Policy, Text Messaging T&C, Rewards T&C, Terms of Use, Site Requirements). Social icons (Instagram, SMS), legal disclaimers, copyright.	All authenticated pages

2.2 Content Components

#	Block Name	Complexity	Description & Behaviour	Reference URL(s)
---	------------	------------	-------------------------	------------------

8	Hero Banner (Animated)	High	Full-width hero with large heading, sub-copy, CTA button, and product/promotional imagery. Features CSS animations, parallax effects, and seasonal theming (e.g., St. Paddy's Day gold coins). Multiple visual variants.	Homepage , About , Products
9	Product Flavor Grid	Medium	Grid of product cards (8-10 items). Each card: product can image, flavor name (H2), strength availability (H5), flavor description paragraph. Some cards have "NEW" badges or dual images. "Find a Store" CTA at bottom.	VELO Plus , VELO
10	Product Comparison	Medium	Side-by-side comparison of VELO Plus vs VELO. Each side: product image, heading, bulleted feature list (moisture, flavors, pouch count, strengths, packaging). CTA to explore the other product variant. Reused across About and Product pages.	About , Products
11	Image Carousel	Medium	Horizontal carousel with prev/next buttons and dot pagination. Shows product lifestyle imagery. 3-5 slides. Auto-advances. Used on product and about pages.	Products , About
12	Rewards Promo Banner	Low	"More Points. More Perks. More Cha-Ching!" promo section with VELO Rewards badge, gold coins imagery, and "Check it Out" CTA. Appears as a reusable module on homepage, product, and store locator pages.	Homepage, Product pages, Store Locator
13	Newsletter Signup (Pouch Talk)	Low	"Sign Up for VELO Pouch Talk" section with descriptive text, "Join Now" CTA, and speech bubble graphic. Reusable bottom-of-page module.	Homepage, Product pages, About
14	Store Locator Teaser	Low	"Help Me Find My VELO" section with map pin imagery, "Find VELO at a store near you" text, and "Find VELO" CTA. Reusable bottom-of-page module.	Homepage, Product pages
15	Google Maps Store Locator	High	Interactive Google Maps embed with numbered markers, zip code search form, "Use My Location" geolocation button, product filter dropdown, scrollable store results list (name, address, store ID, distance, "Get Directions" link, "Products Available" expandable), "Load More" pagination.	store-locator.html
16	Experience Content Card Grid	High	Social-media-style card feed with thumbnail image, points badge (+25/+100/+125), like count, comment count, title, description. Filter tabs (All, Poll, Video). "Load More" pagination. Dynamic content loading.	experience-more.html

17	Interactive Poll	High	Poll question with 3 radio options (each with image). Points earning display ("Members Earn +125 Pts"). "Explore More" CTA. Seasonal/themed content.	feelin-lucky.html
18	Social Comments	High	"Tell Us More" comment section with user avatar + name + location display, 140-character limit textbox, share button, submission guidelines link. Part of gamification engagement.	feelin-lucky.html
19	Content Recommendation Carousel	Medium	"You May Also Enjoy" section with 3 content cards linking to other experience/engagement pages. Each card has image, title. Horizontal scroll with navigation.	feelin-lucky.html
20	Offers / Coupon Section	High	Personalized section showing user's name, available offer count, claimed savings tracker, "Reveal offers" CTA. 5-step instruction layout with phone mockup images. Legal coupon terms.	offers.html
21	FAQ Accordion	Medium	Grouped accordion sections (4 categories, 33 total items). Each section has a heading, items expand/collapse on click. Categories: Product & Warning Information, About VELO, Using VELO, Other Questions.	faq.html
22	Contact Form	Medium	Topic dropdown (8 options), message textarea, submit button. Includes chat button (disabled/conditional), phone click-to-call (1-866-255-1780), business hours display.	contact-us.html
23	Multi-Step Registration Form	High	4-step wizard with progress indicator. Step 1: personal info (name, address, email, DOB). Age/tobacco certification checkbox with legal consent. Multi-step validation with state-by-state compliance. Identity verification integration.	registration.html
24	Video Player	Medium	Video embed with play button overlay and HD quality indicator. Used on How It Works page for rewards education video.	how-it-works.html

Block Consolidation Strategy: The 24 components can be consolidated into **~16 EDS blocks** through design variants:

- **hero** block with variants: animated, product, promotional, brand-partnership
- **cards** block with variants: product-grid, comparison, content-card, recommendation
- **carousel** block with variants: image, content, product
- Shared bottom-of-page modules (rewards promo, newsletter, store teaser) as **fragment blocks**

Section 3 - Page Counts by Template

Template	Est. Page Count	Migration Approach	Notes
Homepage (Authenticated)	1	Manual	Seasonal content, heavy animation, multiple dynamic sections. Requires manual recreation.
Product Catalog	2	Semi-Auto	VELO Plus and VELO. Content structure is standardized; imagery and data can be migrated.
Product Education / Landing	1	Manual	"What Is Velo?" — complex animations, tabbed switcher, carousel.
Content Hub / Gamification	1	Manual	Experience More listing page. Dynamic feed with social engagement metrics.
Gamification / Poll Detail	12-15	Manual	Individual poll/quiz/video pages. Each has unique interactive content + social engagement. ~12 visible in listing, more possible.
Store Locator	1	Manual	Google Maps integration, store API, geolocation. Full custom rebuild required.
Brand Partnership / Landing	2	Automated	McLaren Racing (2025 + potentially archived years). Simple image + text layout.
Form / Support	5	Semi-Auto	Contact Us, SMS Signup, Rewards Enroll, How It Works, Offers. Forms require backend integration.
Legal / Informational (Standard)	5-6	Automated	Privacy Policy, FAQ, Rewards T&C, Tobacco Rights (external redirect). Standardized text content.
Registration / Auth Flow	6-8	Manual	Registration (4-step), Forgot Password, Forgot Username, Site Requirements, Terms of Use, Text Messaging T&C. Uses minimal layout shell. Auth logic is complex.
Rewards Program (Gated)	4-5	Manual	Rewards Home, Catalog, Earn, History, Redemption History. Gated behind loyalty enrollment. Not fully accessible without membership.
Profile (MFA-Gated)	1	Manual	My Profile. Behind MFA (email one-time passcode). Contains personal info, preferences.
TOTAL	~45-60	Auto: ~8 pages Semi-Auto: ~7 pages Manual: ~30-45 pages	

Note: Despite the relatively low page count, the majority of pages (~65-75%) require **manual migration** due to interactive complexity, dynamic personalization, API integrations, and authentication requirements. Only legal/informational pages and simple landing pages are candidates for automated migration.

Section 4 - Integrations Analysis

4.1 Core Platform Integrations

#	Integration	Type	Complexity	Reference URL(s)
1	Adobe Experience Platform Launch	Tag Manager (Embed)	Medium	All pages — <code>assets.adobedtm.com/b57d62cd96da/...</code>
2	Adobe Analytics (AppMeasurement)	Analytics (API)	Medium	All pages — Report suite: <code>raiservices.global.prod</code> , <code>raiservices.sc.omtrdc.net</code>
3	Adobe Target	Personalization (API)	High	All pages — <code>vusevapor.tt.omtrdc.net/rest/v1/delivery</code> . Page-level view triggers for A/B testing.
4	Adobe Audience Manager (AAM)	DMP (API)	Medium	All pages — <code>dpm.demdex.net</code>
5	Adobe Client Data Layer	Data Layer (Embed)	Low	All pages — v2.0.2
6	Adobe Helix RUM	Monitoring (Embed)	Low	All pages — <code>rum.hlx.page</code> (indicates EDS migration planning)
7	Loyalty Plus SDK	Custom (Embed)	High	All authenticated pages — <code>loyaltyplus/clientlibs/clientlib-velo</code> . Points earning, redemption, enrollment.
8	VELO Custom API	REST API	High	All authenticated pages — <code>usapi.velo.com</code> . Auth, profile, offers, notifications, modals, text subscriptions.
9	Google Maps JavaScript API	Embed/API	High	store-locator.html — Advanced Markers, Directions API, Geocoding
10	Google Tag Manager / Google Ads	Tag Manager (Embed)	Medium	All pages — <code>googletagmanager.com/gtag/js?id=AW-670804958</code>
11	MFA / One-Time Passcode	Custom (API)	High	my-profile.html — Email-based OTP verification
12	Age Verification / Identity Check	Custom (API)	High	registration.html — Third-party database identity verification

4.2 Ad-Tech / Programmatic Integrations (25+)

#	Integration	Type	Complexity
13	DoubleClick / Campaign Manager (Floodlight)	Pixel	Low
14	Permutive	DMP (Embed)	Medium
15	Quantcast	Measurement (Embed)	Low
16	iPredictive	Retargeting (Pixel)	Low

17	AppNexus / Xandr	Programmatic (Pixel)	Low
18	LiveRamp / LiveIntent	Identity (Pixel)	Low
19	Zeta Interactive (Rocket Fuel)	Programmatic (Pixel)	Low
20	TVSquared	TV Attribution (Pixel)	Low
21	MediaIQ Digital	Measurement (Pixel)	Low
22	Acuity Platform	Programmatic (Pixel)	Low
23	Affectv	Targeting (Pixel)	Low
24	The Trade Desk	Programmatic (Pixel)	Low
25	Lotame	DMP (Pixel)	Low
26	StackAdapt	Programmatic (Pixel)	Low
27	OpenX	SSP (Pixel)	Low
28	PubMatic	SSP (Pixel)	Low
29	RFI Hub / Eyeota	Data (Pixel)	Low
30	BidSwitch	Exchange (Pixel)	Low
31	Smaato	Mobile Ad (Pixel)	Low

Integration Summary: The site has **12 core platform integrations** (Medium–High complexity) and **19 ad-tech pixel integrations** (Low complexity, managed via Adobe Launch). The ad-tech pixels can be migrated as a single Launch property configuration. The core integrations (Loyalty Plus, VELO API, Google Maps, MFA, Age Verification) require significant custom development.

Section 5 - Complex Use Cases & Observations

#	Use Case	Instances	Where Found	Why It's Complex
1	Age-Gated Authentication	All pages	Entire site (/us/secure/ path)	All content is behind age-verified login (21+). Public-facing pages are limited to login, registration, and forgot password. Registration involves 4-step wizard with third-party identity verification and state-specific compliance. EDS has no native auth framework; requires custom middleware or proxy solution.
2	Loyalty / Rewards Program	~8-10 pages	Rewards enroll, home, catalog, earn, history, how-it-works; points on all engagement pages	Full loyalty platform with points earning (product codes, polls, engagement), redemption catalog, savings tracking, membership gating. Custom "Loyalty Plus" SDK tightly integrated with AEM clientlibs. Points display appears on content cards, poll pages, and promotional banners. Requires custom API integration and state management.
3	Gamification / Social Engagement	12-15 pages	Experience More hub, individual poll/quiz/video pages	Social media-style engagement system: interactive polls with image options, comment system (140-char limit, user avatar/name/location display), like/comment counters, content recommendations. Points earned per interaction. Requires real-time API, user session state, content management system for polls/quizzes.
4	Google Maps Store Locator	1 page	store-locator.html	Full Google Maps JavaScript API integration with Advanced Markers, geolocation ("Use My Location"), zip code search, product availability filtering per store, numbered result markers, "Get Directions" links, "Load More" pagination, store inventory API. Requires Google Maps API key, store data backend, and product availability service.
5	Personalized Content / Adobe Target	All pages	Homepage (seasonal promotions), Offers (user name + offer count +	Adobe Target A/B testing active on every page load. Offers page shows personalized user name

			savings), all pages (AT view triggers)	("NIHAR, YOU HAVE..."), dynamic offer counts, and year-to-date claimed savings. Requires user session data and real-time personalization engine integration.
6	Mobile Coupon System	1 page + ecosystem	offers.html	Digital coupon generation and redemption flow: reveal offers, scan barcode at store, location-based store selection, savings tracking. 5-step process with phone mockup UX. Requires mobile coupon API, barcode generation, geolocation, and store POS integration.
7	Multi-Factor Authentication (MFA)	1 page	my-profile.html	Profile page gated behind email-based one-time passcode. Custom MFA overlay blocks all content until passcode is verified. Separate from primary login authentication. Requires email delivery service and OTP verification API.
8	Notification System	All authenticated pages	Header bell icon, notification center panel	Real-time notification count badge on header bell icon. Slide-out panel shows available coupons count and notification list. Count updates dynamically. Requires real-time or polling API integration.
9	Heavy Ad-Tech Stack (25+ vendors)	All pages	Page source / network requests	25+ ad-tech/programmatic pixels firing on every page (Trade Desk, AppNexus, Quantcast, Permutive, TVSquared, etc.). All managed through Adobe Launch. Must be carefully migrated to EDS delayed.js to avoid performance impact. Tobacco industry has specific advertising compliance requirements.
10	Cross-Brand Integration	2-3 instances	SMS signup (links to vusevapor.com), Tobacco Rights (redirects to ownitvoiceit.com), Adobe Target uses vusevapor.tt.omtrdc.net	VELO shares infrastructure with parent brand VUSE/RAI Services. SMS terms link to vusevapor.com domain. Adobe Target endpoint uses vusevapor subdomain. Tobacco Rights redirects to RAI advocacy site. Cross-brand dependencies must be preserved during migration.
11	Regulatory Compliance	All pages	Warning banner, registration (state-specific), product pages	FDA-mandated nicotine warning on all pages. Age 21+ verification at registration. State-specific privacy rights (CA, VA, CO, UT, CT). Tobacco advertising

restrictions. TCPA compliance for SMS. All must be preserved exactly during migration.

Section 6 - Migration Estimates

6.1 Phase Breakdown

Phase	Duration	Effort (Person-Days)	Details
Phase 1: Infrastructure & Design System	3-4 weeks	15-20 days	EDS project setup, Velo WWangle font integration, global styles (CSS custom properties), nicotine warning banner, global header with notification system, hamburger menu, global footer, safety information bar. Custom delayed.js for 25+ ad-tech pixels.
Phase 2: Authentication & API Layer	4-6 weeks	20-30 days	Age-gated authentication proxy/middleware, session management, <code>usapi.velo.com</code> API integration, MFA for profile, registration multi-step wizard, forgot password flow. This is the highest-risk phase — EDS has no native auth support.
Phase 3: Core Block Development	4-5 weeks	20-25 days	~16 EDS blocks (hero variants, product grid, comparison, carousels, FAQ accordion, contact form, video player, store locator teaser, rewards promo, newsletter signup). Includes responsive design and accessibility.
Phase 4: Complex Features	5-7 weeks	25-35 days	Google Maps store locator, Loyalty Plus rewards integration, gamification engine (polls, comments, likes, points), mobile coupon system, notification center, personalization (Adobe Target), Experience More content hub with filtering/pagination.
Phase 5: Content Migration	2-3 weeks	10-15 days	~45-60 pages. Automated migration for ~8 legal/informational pages. Semi-automated for ~7 form/product pages. Manual for ~30-45 interactive/dynamic pages. Image asset migration.
Phase 6: Integration Testing	2-3 weeks	10-15 days	Analytics validation (Adobe Analytics, Target, AAM), ad-tech pixel verification (25+ vendors), loyalty program end-to-end testing, store locator API testing, form submission testing, MFA flow validation, coupon redemption testing.
Phase 7: QA, Compliance & UAT	3-4 weeks	15-20 days	Cross-browser testing, mobile responsiveness, accessibility (WCAG 2.1 AA), FDA regulatory compliance check (warning labels, age verification), state privacy rights compliance, TCPA compliance for SMS, performance optimization (Lighthouse 100 target), UAT with stakeholders.
Phase 8: Go-Live & Monitoring	1-2 weeks	5-10 days	DNS cutover, redirect mapping, production monitoring, post-launch analytics validation, hotfix period.
TOTAL	24-34 weeks	120-170 person-days	Approximately 6-8 months with a team of 3-4 developers

6.2 Effort Distribution

Category	Effort	% of Total
Automated Migration (legal/informational pages)	3-5 days	~3%
Semi-Automated Migration (forms, product pages)	7-10 days	~6%
Manual / Custom Development	85-120 days	~70%
QA & Testing	25-35 days	~21%

6.3 Cost Estimate

Scenario	Team Size	Duration	Cost Range (USD)
Standard Delivery	3-4 developers	6-8 months	\$180,000 - \$340,000
Accelerated Delivery	5-6 developers	4-5 months	\$250,000 - \$420,000

Cost Assumptions: Blended rate of \$150-\$200/hour per developer. Includes project management overhead (~15%). Does not include third-party API licensing (Google Maps, Loyalty Plus platform, identity verification provider) or ongoing maintenance costs.

6.4 Risk Factors

Risk	Impact	Likelihood	Mitigation
Authentication architecture on EDS	High	High	EDS has no native auth. Requires edge worker/middleware or CDN-level auth proxy. Prototype early. Consider hybrid approach (EDS for public pages, existing AEM for authenticated).
Loyalty Plus SDK compatibility	High	Medium	Custom AEM clientlib SDK needs refactoring for EDS. Engage Loyalty Plus team early. May require API-only integration approach.
Regulatory compliance gap	High	Medium	FDA tobacco marketing regulations are strict. Ensure all warning labels, age gates, and state-specific disclaimers are pixel-perfect. Legal review required before launch.
Ad-tech pixel performance impact	Medium	High	25+ pixels will impact page load. Load all via delayed.js. Audit each pixel for necessity. Consider server-side tag management.
Gamification engine complexity	Medium	Medium	Polls, comments, likes, and points require real-time API. Consider phased rollout: launch without gamification, add in phase 2.
Google Maps API cost	Low	Low	Maps API usage may increase with EDS traffic changes. Monitor API call volumes.
