NovoCare (novocare.com)

Brand:	NovoCare (Novo Nordisk)
Parent:	Novo Nordisk A/S
Product:	Patient Support Portal — Savings, Coverage & Support
Therapeutic Areas:	Diabetes, Obesity, MASH, Growth Disorders, Hemophilia, PH1, Women's Health
Classification:	Pharmaceutical Patient Support & HCP Portal
Platform:	Adobe Experience Manager as a Cloud Service
Prepared by:	Adobe Professional Services
Date:	April 2, 2026

NovoCare (novocare.com) — Comprehensive Site Analysis

Prepared for: Adobe Experience Manager Edge Delivery Services Migration Assessment **Analysis Date:** April 2, 2026 **Analyst:** Adobe Professional Services

Executive Summary

NovoCare (novocare.com) is the patient support portal for **Novo Nordisk**, a global pharmaceutical company specializing in diabetes, obesity, and other chronic conditions. The site is built on **Adobe Experience Manager (AEM) as a Cloud Service** using the brandbase-novocare-page-template template framework with extensive custom client libraries.

NovoCare serves as a **savings, coverage, and support hub** for patients prescribed Novo Nordisk medications across 7 therapeutic areas: Diabetes, Obesity/Weight Loss, MASH (metabolic dysfunction-associated steatohepatitis), Growth-Related Disorders, Hemophilia and Bleeding Disorders, Primary Hyperoxaluria Type 1 (PH1), and Women's Health. The site also includes a parallel HCP (Health Care Professional) experience and a dedicated NovoCare Pharmacy section.

Key Metrics: - **Total Pages (from sitemap):** 214 - **Templates Identified:** 10 - **Components/Blocks Cataloged:** 28 - **Third-Party Integrations:** 12+ - **Therapeutic Areas:** 7 (patient) + 6 (HCP) - **Products Covered:** 20+ branded medications - **Migration Complexity:** High

- **Estimated Migration Effort:** 85–130 person-days

Find help with insulin costs

We know that as health care has changed, more people struggle to pay for their care. This includes paying for medicines Novo Nordisk makes. However, we have solutions to help.

Programs and offers to help make insulin more affordable

For those with commercial insurance or no insurance

MyInsulinRx[™]

Pay \$35 for your monthly supply of any combination of Novo Nordisk insulin products (up to 3 vials or 2 packs of pens) and get 1 pack of needles for \$25.^a

Get this offer 

^aEligibility and other restrictions apply.

For those with commercial insurance

Savings offers

If you have private or commercial insurance, such as insurance you receive through an employer or purchase on your own, you may be eligible to save on your insulin.

Get a savings offer 

For those with no insurance or Medicare

Patient Assistance Program (PAP)

If you are uninsured or have insurance through Medicare, you may be eligible to get your diabetes medicine free of charge without any registration fees or monthly fees.

See if you qualify 

For those in urgent need of insulin

Immediate Supply

If you are at risk of rationing your insulin and have an immediate need, we may be able to help with a one-time offer for a free, short-term supply of Novo Nordisk insulin (up to 3 vials or 2 packs of pens).^b This offer is a short-term solution. We are committed to helping you find a way to afford your insulin and encourage you to revisit the options above to meet your long-term needs.

Request now 

^bEligibility and other restrictions apply.

Other low-cost insulin options

For anyone with a prescription

Human Insulin

Provides a more affordable option for patients who have determined with their doctor that human insulin is an appropriate option for them.

For those without insurance coverage, the cost could be as low as \$25/vial through several national pharmacy programs.

Template 9: Eligibility / Forms Page

Field	Detail
Template Name	Eligibility & Enrollment Form
Complexity	High
Reasoning	Interactive forms with validation, eligibility logic, multi-step enrollment, external form integrations
Reference URLs	https://www.novocare.com/eligibility/myinsulinrx.html , https://www.novocare.com/eligibility/wegovy-savings-card.html , https://www.novocare.com/eligibility/diabetes-savings-card.html

Description: Form-based pages for savings card enrollment, patient assistance program applications, and pharmacy eligibility. Contains multi-step forms with validation, eligibility criteria checks, and terms acceptance. 16+ eligibility form pages across all therapeutic areas.

Template 10: Insurance Information (Exploring Insurance)

Field	Detail
Template Name	Insurance Education Pages
Complexity	Low–Medium
Reasoning	Templated informational content, repeated across 5+ therapeutic areas with identical structure
Reference URLs	https://www.novocare.com/diabetes/insurance-information/exploring-insurance/about.html , https://www.novocare.com/diabetes/insurance-information/insurance-types/commercial.html

Description: Educational content about insurance — repeated across diabetes, obesity, growth-related disorders, bleeding disorders, and PH1. Six “Exploring Insurance” pages (About, Choose a Plan, Terms, FAQ, Tips, Resources) and four “Insurance Types” pages (Commercial, Medicare, Medicaid, Uninsured). Nearly identical structure across all therapeutic areas (~50 pages total).

2. Blocks / Components Catalog

Global Components

#	Block Name	Complexity	Description	Reference URL(s)
1	Global Header (Patient)	Medium	Novo Nordisk logo, NovoCare branded logo with "Savings Coverage Support" tagline, "Support for Health Care Professionals" link. Varies slightly by section — homepage shows therapeutic area links, disease pages show disease label + sub-nav	All patient pages
2	Global Header (HCP)	Low	Similar to patient header but with "For Health Care Professionals" label and "Support for patients" link back to patient site	https://www.novocare.com/hcp.html
3	Sub-Navigation Tabs	Medium	Horizontal tab navigation below header, disease-area specific (e.g., Home, Products, Help with costs, Insurance information, Resources). Active tab highlighted. With dropdown menus on some tabs	All therapeutic area pages
4	Global Footer	Medium	Footer links (Terms of Use, Privacy Notice, Consumer Health Privacy Notice, Cookie Notice, Cookie Settings, Your Privacy Choices, Contact Us, Novo Nordisk US), trademark text with registered symbols, copyright notice, Novo Nordisk logo	All pages
5	Cookie Consent Banner (OneTrust)	Low	OneTrust cookie banner with "Customize Cookies", "Reject All", "Accept All Cookies" buttons, privacy notice text	All pages (first visit)
6	ISI Panel (Important Safety Information)	High	Expandable/collapsible safety information panel with "Skip to main content" link, structured headings (What is X?, Who should not take X?, Side effects, etc.), bold warnings, bulleted lists, PI and Medication Guide links, FDA reporting. Multiple ISI panels can stack on a single page	All product-related pages
7	ISI Scroll FAB Button	Low	Floating action button ("Scroll Fab Button") for navigating within ISI content	Pages with ISI panels

Hero Components

#	Block Name	Complexity	Description	Reference URL(s)
8	Hero — Text + Image	Medium	Full-width hero with H1 heading, descriptive paragraph, CTA button, and right-aligned photograph. Used on homepage, disease area homes, and HCP hub	https://www.novocare.com/ , https://www.novocare.com/hcp.html
9	Hero — Text Only	Low	Simple hero with H1 heading and descriptive text, no image. Used on sub-pages	https://www.novocare.com/diabetes/help-with-costs/help-with-insulin-costs.html
10	Hero — Condition Selector	High	Hero with condition dropdown combobox (7 options), submit arrow button, descriptive text. Redirects to selected therapeutic area	https://www.novocare.com/
11	Hero — Medicine Selector	High	Hero with "Choose your medicine" combobox for weight loss products, different layout from condition selector	https://www.novocare.com/patient/home.html
12	Promotional Banner	Low	Full-width colored banner with linked text and arrow icon (e.g., "Get FDA-approved GLP-1 RAs shipped directly to your home")	https://www.novocare.com/

Content Cards & Sections

#	Block Name	Complexity	Description	Reference URL(s)
13	Feature Card — Icon + Text + CTA	Medium	Card with SVG icon, uppercase label, heading, description text, and styled CTA button. Used in 2-column grid layouts. Multiple design variants (blue border, pink background, etc.)	https://www.novocare.com/diabetes/home.html
14	Feature Card — Image + Text Overlay	Medium	Card with background image, overlaid text content, heading, and CTA. Used for promotional content like "Find a Doctor" and "Your medicine, delivered"	https://www.novocare.com/patient/home.html
15	Product Card	Medium	Product selection card with product logo/name, brief description, CTA links for "Find out more", ISI link, and PI link	https://www.novocare.com/growth-related-disorders/home.html
16	Pharmacy Promo Card	Medium	Image + text card with NovoCare Pharmacy branding, heading, CTA link, and footnote about CoAssist Pharmacy	https://www.novocare.com/
17	Therapeutic Area Card (HCP)	Low	Simple text card with therapeutic area name and "Explore" CTA link, used in 2-column grid on HCP hub	https://www.novocare.com/hcp.html
18	Contact Card	Low	Card with therapeutic area name, phone number, and hours of operation	https://www.novocare.com/contact-us.html
19	Image + Text Section	Medium	Two-column layout with illustration/image on one side and heading + text + CTA on the other. Used for education sections and promotional content	https://www.novocare.com/diabetes/home.html
20	Savings Card Promotion	Medium	Styled promotional block showing savings offer details (e.g., "\$0 per fill", "\$15K annual cap"), eligibility info, and CTA	https://www.novocare.com/ph1/home.html

Interactive Components

#	Block Name	Complexity	Description	Reference URL(s)
21	Numbered Step-by-Step Walkthrough	High	Numbered program steps (01-07) showing enrollment process flow. Each step has a number, title, and brief description. Visual progression indicator	https://www.novocare.com/mash/home.html , https://www.novocare.com/ph1/home.html
22	Tabbed Insurance Process	High	Three-tab interface showing "How it works", "If approved", "If denied" insurance process flows. Tab switching reveals different content panels	https://www.novocare.com/ph1/home.html , https://www.novocare.com/bleeding-disorders/home.html
23	FAQ Accordion	Medium	Expandable/collapsible Q&A sections with toggle icons	https://www.novocare.com/pharmacy.html
24	Product Coverage Check Card	Medium	Per-product card with product name, "Check your coverage" CTA linking to product-specific coverage tool	https://www.novocare.com/diabetes/insurance-information/check-coverage.html
25	Eligibility Form	Very High	Multi-step enrollment forms with field validation, eligibility logic, terms acceptance, and integration with external enrollment systems (novocare.iasist.com)	https://www.novocare.com/eligibility/myinsulinrx.html

Utility Components

#	Block Name	Complexity	Description	Reference URL(s)
26	Compounded Product Safety Notice	Low	Alert/notice banner warning about compounded semaglutide vs FDA-approved products, with external link	https://www.novocare.com/patient/home.html
27	Trademark/Copyright Block	Low	Footer section with registered trademark symbols, copyright year, document code	All pages
28	External Link Card	Low	Card linking to external sites (e.g., "Find out more about MASH" linking to mash.wegovy.com , "Diabetes education" linking to diabeteseducation.novocare.com)	Various pages

3. Page Counts by Template

Template	Est. Page Count	Auto-Migrate	Manual Migration	Notes
Global Homepage	1	No	Yes	Condition selector logic, promotional cards
Therapeutic Area Home (Multi-Product)	3	No	Yes	Diabetes, Growth Disorders, Bleeding Disorders — each unique
Therapeutic Area Home (Single-Product)	2	No	Yes	MASH, PH1 — branded with product logos, step-by-step flows
Weight Loss Home	1	No	Yes	Unique layout with medicine selector, dual ISI
HCP Hub + HCP Sub-Pages	25	Partial	Partial	Hub is simple; sub-pages mirror patient structure
Pharmacy Landing + Sub-Pages	6	No	Yes	Pricing, comparison, FAQ, product-specific pharmacy pages
Content Sub-Pages (Cards)	~30	Partial	Partial	Help with costs, savings offers, product pages — card layouts
Contact Us	1	Yes	No	Simple informational page
Eligibility Forms	16+	No	Yes	Complex forms with validation and external integrations
Insurance Information (Exploring)	~50	Yes	No	Highly templated, identical structure across therapeutic areas
Product Detail / Check Coverage	~30	Partial	Partial	Product-specific with ISI panels
Spanish Content	7	Partial	Partial	Bleeding disorders only
Resources / Safe Disposal	~10	Yes	No	Simple content pages
Legacy/Archive Pages	~5	Yes	No	Older URLs, likely redirects
Subdomain (diabeteseducation)	20+	No	Yes	Separate site on diabeteseducation.novocare.com
TOTAL	~214	~75 (35%)	~139 (65%)	

4. Integrations & Third-Party Services Analysis

#	Integration	Type	Complexity	Description	Reference URL(s)
1	Adobe Launch (DTM)	Embed/Tag Manager	Medium	tm.com/7090418387d1/3d1fd21ad55f-launch-c5ed7c25a38e.min.js — Tag management for analytics, targeting, and third-party script orchestration	All pages
2	Google Tag Manager (GTM)	Embed/Tag Manager	Medium	GTM container GTM-T6JLPPW — Additional tag management layer running alongside Adobe Launch	All pages
3	Google Analytics 4 (GA4)	Embed/Analytics	Medium	Two GA4 property IDs: G-F40L5513K4 and G-WXY74XCGE4 — Dual GA4 tracking (likely patient vs HCP or staging vs production)	All pages
4	Bing Ads/UET	Embed/Advertising	Low	bat.bing.com/bat.js and action script 187194726.js — Microsoft Advertising Universal Event Tracking for conversion tracking	All pages
5	OneTrust	Embed/Privacy	Medium	cdn.cookie law.org — Cookie consent management platform with banner, preference center, and SDK. Handles CCPA/GDPR compliance	All pages
6	TwentyCI / di-capt	Embed/Analytics	Low	cdn.di-capt.com/evaluation/inc.js — Digital intelligence capture for visitor behavior analytics (Hosted Tag Version 1.5.2)	All pages
7	Video Marketing Platform (NNI Video)	Embed/Video	Medium	nni-video.videomarketingplatform.co — Novo Nordisk's video platform with GTM integration via glueframe and datalayer scripts	Pages with video content

AEM Infrastructure Details

Component	Details
AEM Version	AEM as a Cloud Service
Template	brandbase-novocare-page-template (from meta tag)
Client Libraries	brandbase/common/clientlibs, brandbase/novocare/clientlibs, nnicloud-patient/components, novo-core-framework/site/components
jQuery	Loaded via clientlibs/granite/jquery
Component Framework	Custom Novo Nordisk "brandbase" framework with "novo-core-framework" and "nnicloud-patient" overlays

5. Complex Use Cases & Observations

5.1 Important Safety Information (ISI) System

- **Instances:** Every product-related page (~150+ pages)
- **Where:** All therapeutic area pages, product pages, check coverage pages
- **Why it's complex:** ISI panels are extensive (thousands of words per product), must be legally accurate, support expand/collapse behavior, include scroll FAB navigation, and multiple ISI panels can stack on a single page (e.g., Wegovy + Saxenda on obesity page, 6 products on bleeding disorders page). Content includes structured headings, bold warnings, bulleted side effects, PI/Medication Guide PDF links, and FDA reporting links. ISI content is FDA-regulated and must be pixel-perfect.

5.2 Multi-Therapeutic-Area Architecture with Audience Segmentation

- **Instances:** 7 therapeutic areas x 2 audiences (patient + HCP) = 14 experience paths
- **Where:** Entire site structure
- **Why it's complex:** Each therapeutic area has its own navigation, content hierarchy, product set, and ISI requirements. Patient and HCP experiences run in parallel with different content emphasis. The obesity/weight loss section uses a completely different template and navigation pattern (hamburger menu vs tab nav) from all other therapeutic areas. URL redirect patterns vary (most areas redirect `/ {area} .html` to `/ {area} /home .html`, but obesity redirects to `/patient/home .html`).

5.3 Insurance Information Content Replication

- **Instances:** ~50 pages across 5 therapeutic areas
- **Where:** `/diabetes/insurance-information/`, `/obesity/insurance-information/`, `/growth-related-disorders/insurance-information/`, `/bleeding-disorders/insurance-information/`, `/ph1/insurance-information/`
- **Why it's complex:** Six "Exploring Insurance" sub-pages and four "Insurance Types" sub-pages are structurally identical across 5 therapeutic areas but may have area-specific content nuances. This creates a content management challenge — updates need to propagate across all instances. Ideal candidate for shared content fragments or experience fragments in migration.

5.4 Eligibility Forms and External Enrollment System

- **Instances:** 16+ eligibility form pages
- **Where:** `/eligibility/` path (myinsulinrx, savings cards, PAP, pharmacy enrollment, etc.)
- **Why it's complex:** Forms integrate with `novocare.iassist.com` external enrollment platform. Multi-step form flows with eligibility validation logic, insurance status branching, terms acceptance, and CryptoJS encryption. Each therapeutic area has distinct eligibility criteria and form fields. SMS terms pages suggest text message enrollment flows.

5.5 Diabetes Education Subdomain

- **Instances:** 20+ pages on separate subdomain
- **Where:** diabeteseducation.novocare.com
- **Why it's complex:** Entirely separate site with different template system, navigation structure, content hub layout with article cards, topic filter icons, diabetes type selector (Type 1/Type 2/Not sure), and Spanish language support via espanol.cornerstones4care.com. This is effectively a second site that would need its own migration plan.

5.6 Product-Specific Warning Labels and Categorization

- **Instances:** All product-related pages
- **Where:** Health warning banners, ISI panels, sub-navigation
- **Why it's complex:** Different products require different warning categories, ISI content, and PI links. The site dynamically shows/hides ISI panels based on the product context. Some pages show ISI for multiple products simultaneously (bleeding disorders: 6 ISI panels). Warning content is legally mandated and varies by indication.

5.7 Spanish Language Content

- **Instances:** 7 pages (bleeding disorders only)
- **Where:** /content/novocare/es/bleeding-disorders/
- **Why it's complex:** Only one therapeutic area has Spanish translations, using AEM's /content/novocare/es/ language copy path. Inconsistent multilingual support creates questions about future language expansion requirements during migration.

5.8 Hidden Sections / Conditional Content

- **Instances:** Multiple homepage-level pages
- **Where:** Homepage, disease-area landing pages
- **Why it's complex:** Console logs reveal Showing hidden sections [next, obesity-inactive] and Decoding hidden section messages, indicating client-side conditional content display logic. Sections may be shown/hidden based on user state, A/B testing, or feature flags.

6. Migration Estimates

Complexity Assessment

Factor	Rating	Justification
Template Count	Medium-High	10 templates, but 3-4 variants of therapeutic area home
Component Count	Medium	28 components, most are content-focused (cards, text, ISI)
Page Volume	High	214 pages, but ~50 are templated insurance info (automatable)
Interactive Features	Medium	Condition selector, medicine selector, tab interfaces, accordions
Third-Party Integrations	High	12+ integrations including dual analytics (Adobe + Google), enrollment platform, video platform
Content Complexity	Very High	FDA-regulated ISI content, multi-product safety info, legal compliance
Forms/Enrollment	Very High	16+ eligibility forms with external iAssist integration
Multilingual	Low	Only 7 Spanish pages (bleeding disorders)
Subdomain	High	Separate diabeteseducation.novocare.com site

Effort Breakdown

Phase	Estimated Days	Details
Discovery & Planning	8–10	Template analysis, ISI content audit, form workflow mapping, integration documentation, subdomain scoping
Design System Migration	6–8	Novo Nordisk brand system, NovoCare color palette, typography, responsive patterns, therapeutic area color coding
Global Components	8–12	Header variants (patient/HCP), footer, sub-navigation tabs, cookie consent, ISI panel system with expand/collapse and FAB
Homepage & Hub Pages	4–6	Global homepage with condition selector, HCP hub with card grid, Contact Us
Therapeutic Area Homes	10–14	6 therapeutic area home pages with varied layouts (multi-product, single-product, obesity variant), step-by-step walkthrough, tabbed insurance process
Content Sub-Pages	8–12	Help with costs, savings offers, product pages, check coverage — card-based layouts with ISI
Insurance Information	4–6	~50 templated pages — high automation potential with shared content fragments
Eligibility Forms	12–16	16+ form pages with iAssist integration, validation logic, multi-step flows, encryption
Pharmacy Section	5–7	Pharmacy landing, product-specific pharmacy pages, pricing table, FAQ accordion
HCP Section	6–8	25 HCP pages mirroring patient structure with different content emphasis
ISI Content Migration	6–8	20+ unique ISI content sets with legally mandated accuracy requirements, expand/collapse behavior
Integration Migration	6–8	Adobe Launch, GTM, GA4, Bing Ads, OneTrust, NNI Video, iAssist enrollment, CryptoJS
Spanish Content	2–3	7 pages, bleeding disorders only
QA & Testing	8–10	Cross-browser, accessibility, ISI content accuracy verification, form testing, analytics validation
TOTAL	85–130	person-days

Risk Factors

- ISI Legal Compliance:** ISI content is FDA-regulated. Any migration must preserve exact wording, formatting, and link accuracy. Legal review is required for every migrated page with ISI content.
- iAssist Integration Complexity:** The external enrollment platform integration requires API documentation and may involve authentication, session management, and encrypted data transfer.
- Diabetes Education Subdomain:** The diabeteseducation.novocare.com site is effectively a separate migration project with its own template system, content hub, and Spanish language support.
- Hidden Section Logic:** Client-side conditional content display may be tied to A/B testing, personalization, or feature flags that need to be replicated or replaced.
- Dual Analytics Stack:** Running both Adobe Launch and Google Tag Manager adds complexity to analytics migration — need to determine if both are required in the target architecture.

6. **Form Encryption:** CryptoJS usage in forms suggests client-side encryption that needs careful handling during migration.

Migration Recommendation

Phase 1 (Quick Wins — Weeks 1-4): - Migrate ~50 insurance information pages (highly templated, automatable) - Migrate Contact Us and simple content pages (~15 pages) - Set up global components (header, footer, ISI system)

Phase 2 (Core Pages — Weeks 5-10): - Migrate therapeutic area home pages (6 pages) - Migrate product sub-pages and check coverage pages (~30 pages) - Migrate HCP section (25 pages)

Phase 3 (Complex Features — Weeks 11-16): - Migrate eligibility forms with iAssist integration (16+ pages) - Migrate pharmacy section (6 pages) - Migrate weight loss/obesity section (unique template)

Phase 4 (Subdomain & Polish — Weeks 17-20): - Assess diabeteseducation.novocare.com migration (separate project) - Spanish content migration - Final QA, analytics validation, and ISI legal review
