Executive Summary

8

Page Templates
(5 in-scope)

23

Unique Blocks /
Components

~400

Estimated Total
Pages (en-US)

12

Third-Party
Integrations

Key Finding: The site operates as two distinct applications — a **marketing content site** (Sitecore-based with `flex-*` components) and the **Partner Center portal** (different header, footer, navigation, and form system). The training section redirects to an external domain (skilling-hub.com). Migration scope should focus on the marketing content site only.

The partner.microsoft.com site is built on **Sitecore CMS** with a rich integration ecosystem including Tealium tag management, Microsoft Clarity analytics, Sitecore CDP personalization, and Azure Application Insights monitoring. The marketing content site uses a modular component system with `flex-*` prefixed components and a Bootstrap-based grid layout.

Of the ~400 in-scope pages, approximately **350 are blog articles** suitable for automated bulk import, while ~40 marketing/landing pages will require individual manual migration with custom block development.

1. Templates Inventory

#	Template Name	Complexity	Description	Reference URL
1	Homepage	High	Rich marketing page with notification banner, hero with CTA, card grid, step-by-step feed, tabbed content switcher (dark theme), CTA banner, social/share bar.	partner.microsoft.com/en-US/
2	Marketing Landing Page	Med-High	Reusable template for partnership/program pages. Hero with image, body text, card sections, CTA callouts, social bar. Uses flex-hero-v2 , flex-card-container , feed-unit components.	partnership, solutions/azure
3	Comparison / Program Page	High	Notification banner, intro section, image+text cards, interactive tabs with comparison tables, pricing cards, feature benefit cards, footnotes section.	partnership/compare-programs, partnership/marketplace
4	Blog Listing Page	High	Featured hero article, secondary featured cards (2-up), tile/list view toggle, category filtering, search, sort dropdown, pagination (44+ pages), sidebar with recommended topics & social links.	blog
5	Blog Article Detail	Medium	Breadcrumbs, article hero with author/date metadata, rich text body with embedded media (YouTube iframes), related articles sidebar, "More from category" section, share/social widgets.	blog/article/*
6	Support / Form Page	High	Completely different UI framework (Partner Center). Different header/footer, multi-step form wizard, category dropdowns, topic shortcuts. <i>Recommended: Out of scope.</i>	support/?stage=1

#	Template Name	Complexity	Description	Reference URL
7	Dashboard / Auth Portal	Very High	Authentication-gated SPA portal. OpenID Connect login, Partner Center dashboard, account management. Entirely different application. <i>Recommended: Out of scope.</i>	dashboard (requires login)
8	External Training Hub	Out of Scope	Redirects to external domain (skilling-hub.com). Separate React/Vite SPA with different branding, auth, and infrastructure.	training → skilling-hub.com

2. Blocks / Components Catalog

2.1 Global Components (present on all marketing pages)

#	Block / Component	Complexity	Description	Screenshot
1	Global Header / Navigation	High	Microsoft logo, primary nav with 7 top-level items (Partnership, Explore, Connect, Blogs & stories, Skilling, More), mega-menu dropdowns with icons/descriptions/grouped links, search, "Partner Center" link, "Sign in" link. Responsive hamburger menu on mobile.	block-header-nav.png
2	Notification Banner	Low	Dismissible alert bar with icon, heading, description text, and CTA link. Supports variants: green (success), blue (info). Close button (x) with cookie persistence. Component class: <code>flex-notification</code> .	block-notification-banner.png
3	Social / Share Bar	Low	"Follow Us" social media links (Facebook, Twitter, LinkedIn, YouTube), "Was this page helpful?" feedback widget (Yes/No), "Share" links. Blue background variant.	block-social-share.png
4	Global Footer	Medium	4-column link grid (Get started, Grow With Us, Resources, Support), locale selector (50+ countries), privacy choices links, legal links (Contact, Privacy, Terms, Trademarks, Code of Conduct), copyright notice.	block-footer.png

2.2 Content Blocks

#	Block / Component	Complexity	Description	Used In
5	Hero (flex-hero-v2)	Medium	Full-width hero with background image, H1 heading, description, primary CTA button, secondary link. Variants: standard (dark overlay), light text, blue background (<code>bg-blue-style</code>).	Homepage, Landing Pages
6	Card Grid (flex-card-container)	Medium	Multi-column card layout (2, 3, or 4 columns). Cards include: image, category badge (colored header), heading, description, CTA link. Variant: <code>flex-card-feature</code> with icon badges.	Homepage, Landing, Marketplace
7	Steps / Feed (feed-unit)	Medium	Numbered step-by-step layout with icon, heading, and description per step.	Homepage, Landing

#	Block / Component	Complexity	Description	Used In
			Typically 3 steps. Used for onboarding/process flows.	
8	Tabbed Content Switcher	High	Left sidebar tab navigation + right content panel (flex-content-switcher / flex-tabs). Supports dark-blue theme. Panels can contain: text, images, cards, comparison tables, pricing info.	Homepage, Compare, Marketplace
9	CTA Banner	Low-Med	Full-width colored background (blue/dark) with heading, description, and CTA button. A variant of the hero component used mid-page as a call-to-action section.	Homepage, Solutions, Compare
10	Image + Text (side-by-side)	Low-Med	Two-column layout: image on one side, heading + text + CTA on the other. Supports image-left and image-right variants.	Compare, Marketplace, Landing
11	Icon Feature Cards	Medium	3-column card layout with icon/illustration at top, heading, description text, CTA link. Used for feature highlights without images.	Marketplace, Compare, Solutions
12	Success Story Cards	Medium	3-column grid with image thumbnail, heading, description, CTA link. Image has overlay/hover state. Used for testimonials and case studies.	Marketplace
13	Resource Cards (bordered)	Medium	4-column card grid with blue bottom border, heading, description, CTA link. Clean/minimal design for linking to external resources.	Marketplace, Solutions
14	Pricing / Comparison Cards	High	Side-by-side card layout with heading, feature lists, pricing info, CTA button. Used inside tab panels. Includes footnote superscripts and legal text.	Compare Programs
15	Blog Featured Hero	Medium	Large featured article card with image, category tag, heading, excerpt, read time, CTA. Used at top of blog listing page.	Blog Listing
16	Blog Tile / Card	Low-Med	Standard blog listing card with thumbnail image, category tag, title, excerpt, date, read time. Supports tile and list view modes.	Blog Listing
17	Blog Sidebar	Medium	Sidebar with "Recommended Topics" links and "Follow Us" social links. Sticky-on-scroll behavior.	Blog Listing
18	Article Body (rich text)	Medium	Rich text content area supporting: headings, paragraphs, inline images, lists, bold/italic, blockquotes,	Blog Article

#	Block / Component	Complexity	Description	Used In
			embedded YouTube iframes, and inline links.	
19	Related Articles	Low-Med	"More from [category]" section with 3-column article card grid at bottom of article pages.	Blog Article
20	Breadcrumbs	Low	Text breadcrumb trail for navigation hierarchy. Used on blog articles and deeper subpages.	Blog Article

2.3 Partner Center Components (different UI framework)

#	Block / Component	Complexity	Description	Used In
21	Partner Center Header	High	Completely different header from marketing site. Different logo treatment, navigation structure, user menu.	Support, Dashboard
22	Multi-Step Form Wizard	Very High	Step indicator, category dropdowns, topic shortcuts, form validation, conditional fields. Used for support ticket creation.	Support
23	Partner Center Footer	Medium	Different footer layout from marketing site. Reduced link set, different styling.	Support, Dashboard

3. Page Counts by Template

Template	Est. Page Count	Auto-Migratable	Manual Migration	Notes
Homepage	1	No	1	Unique layout, requires custom block development
Marketing Landing Pages	~25-35	Partial	~20	Partnership, Solutions (Azure, M365, Security, etc.), Go-to-market, ISV, CSP, New commerce
Comparison / Program Pages	~8-10	Partial	~8	Compare programs, Marketplace, Solutions Partner. Tabs + comparison tables need manual work.
Blog Listing	1 (+44 paginated)	No	1	Single listing template; pagination is dynamic/JS-driven
Blog Articles	~350+	Yes (bulk)	~10 for QA	High-volume, consistent structure. ~44 pages x 8 articles. Bulk importable.
Support / Form Pages	~5-8	No	Out of scope	Different framework (Partner Center). Recommend exclusion or rebuild.
Dashboard / Portal	~50+	No	Out of scope	Authenticated SPA. Not suitable for EDS migration.
Training Hub	N/A	N/A	N/A	External domain (skilling-hub.com). Out of scope.
TOTAL (in-scope)	~390-405	~350	~40	Blog articles are bulk-importable; marketing pages need individual attention

Locale Multiplier: The site supports 50+ country/language variants via a locale selector. The page counts above reflect **en-US only**. Full internationalization would multiply the in-scope count significantly.

4. Integrations Analysis

#	Integration	Type	Complexity	Description
1	Tealium Tag Manager	Tag Management	High	Primary tag management system (<code>tags.tiqcdn.com/utag/msft/mpartner/prod/utag.js</code>). Orchestrates all analytics tags. Includes Tealium Visitor Service for cross-domain tracking.
2	Microsoft Clarity	Analytics / Heatmaps	Medium	Session recording and heatmap analytics (<code>scripts.clarity.ms</code> , <code>tag_bcxrxdw8j9</code>).
3	Sitecore CDP / Engage	Personalization	Very High	Real-time personalization engine with A/B testing and targeted content delivery via Sitecore Web Flow libs. Deep CMS integration that drives content variants.
4	Azure Application Insights	APM / Monitoring	Medium	Application performance monitoring (<code>az416426.vo.msecnd.net + js.monitor.azure.com</code>). Tracks page load times, errors, custom events.
5	Microsoft Cookie Consent	Privacy / Compliance	Medium	GDPR/CCPA cookie consent banner (<code>wcpstatic.microsoft.com/mssc/lib/v2/wcp-consent.js</code>). Controls other script loading based on consent.
6	OpenID Connect Auth	Authentication	High	Authentication via <code>/_login?authType=OpenIdConnect</code> . Redirects to Microsoft identity platform. Gates Partner Center, Dashboard, and resources.
7	Chatbot	Customer Support	Med-High	Custom chat widget (<code>chatBot.js</code>). Likely Azure Bot Service or Power Virtual Agents integration.
8	Microsoft Survey Broker	Feedback / Survey	Low-Med	Intercept survey/feedback system (<code>microsoft.com/library/svy/partner/broker.js</code>).
9	Medius Video	Video / Media	Low-Med	Video conversion/player library (<code>medius-video-convert.js</code>). Handles embedded video content.
10	YouTube Embeds	Video / Media	Low	Standard YouTube iframe embeds in blog articles and marketing pages.
11	Sitecore CMS	Content Management	Very High	Current CMS platform. Evidenced by <code>CDP.js</code> , <code>/mssc/</code> asset paths, Sitecore CDP integration. All content structured in Sitecore content trees.
12	Bootstrap Grid	CSS Framework	Medium	Bootstrap-based responsive grid system (<code>col-md-x-8</code> , <code>col-sm-x-12</code>). Layout dependency across all marketing pages.

5. Complex Use Cases & Observations

5.1 Critical Observations

#	Issue	Severity	Description
1	Two Distinct UI Frameworks	Critical	The site runs two completely different applications: (a) Marketing/content pages (Sitecore with <code>flex-*</code> components) and (b) Partner Center portal (different header, footer, nav, form system). The Support page visually and structurally differs from all marketing pages. These cannot share Edge Delivery blocks.
2	Sitecore CDP Personalization	High	The site uses Sitecore CDP for real-time personalization (A/B tests, targeted content, web flows). Migrating to Edge Delivery Services means losing this personalization layer unless replaced with an equivalent solution (e.g., Adobe Target, AEM Experimentation).
3	Authentication Gate	High	Multiple sections require OpenID Connect authentication (Dashboard, resources, support). EDS pages are static/CDN-served. Authentication flows need a separate solution (redirect to external auth portal, client-side auth SDK).
4	Blog Pagination & Dynamic Features	High	Blog listing has 44+ pages with: client-side search, sort dropdown, tile/list view toggle, category filtering. All currently JavaScript-driven. Requires custom EDS block development or external content API integration.
5	50+ Locale Variants	High	The site supports 50+ country/language combinations. Each locale variant may have different content, not just translations. This multiplies page count significantly.
6	Training Redirects Externally	Medium	<code>/training</code> redirects to <code>skilling-hub.com</code> , a completely separate React/Vite SPA. Out of scope for migration, but navigation links must be preserved.
7	Complex Tab Components	Medium	The <code>flex-content-switcher</code> / <code>flex-tabs</code> component supports multiple content types within panels (text, cards, comparison tables, pricing), dark themes, and interactive state. Requires custom EDS block.
8	Mega-Menu Navigation	Medium	Primary navigation has 7 top-level items with multi-level mega-menu dropdowns. Significant content in dropdowns (icons, descriptions, grouped links). Requires custom EDS nav block.
9	Notification Banner System	Low-Med	Dismissible notification banners with close button, cookie persistence. Appears on some pages, not others.
10	Embedded PDF / Asset Links	Low	Multiple pages link to PDFs and downloadable assets (<code>assetsprod.microsoft.com</code>). External asset references need to be preserved or migrated.
11	Footnote System	Low	Compare Programs page uses superscript footnotes with numbered references and legal disclaimers at page bottom.

#	Issue	Severity	Description
			Needs proper semantic markup in EDS.

5.2 Out-of-Scope Areas (Recommended Exclusions)

Area	Reason for Exclusion
Partner Center Dashboard	Authenticated SPA, completely different application architecture
Support Ticket System	Different UI framework, form-heavy, requires dedicated backend
Training Hub (skilling-hub.com)	External domain, separate React application
Authenticated Resources	Content behind login walls, requires auth infrastructure

6. Migration Estimates

6.1 Phase Breakdown

Phase	Scope	Effort (days)	Notes
Design System Migration	Global styles, fonts, colors, spacing, CSS custom properties	3-5	Extract from Sitecore CSS, map to EDS design tokens
Navigation & Header/Footer	Mega-menu nav, footer with locale selector	3-5	Complex mega-menu requires custom EDS block
Core Block Development	~15 unique blocks/variants	15-25	Hero, cards, tabs, CTA, steps, notification, social bar, etc.
Homepage	1 page, high complexity	2-3	After core blocks are built
Marketing Landing Pages	~30 pages, medium complexity	10-15	Mix of automated + manual using shared blocks
Blog Listing Template	1 template + custom JS block	5-8	Search, filter, pagination, view toggle functionality
Blog Article Template	1 template, bulk content	3-5	Template development + import script authoring
Blog Article Content	~350 articles, bulk import	3-5	Automated bulk import with QA sampling
Integrations Replacement	Analytics, consent, feedback	5-8	Replace Tealium/Clarity/CDP with EDS-compatible equivalents
QA & Visual Regression	All templates, responsive breakpoints	8-12	Desktop + tablet + mobile testing across all templates
Locale Framework	Multi-locale routing setup	3-5	URL structure and locale selection mechanism

6.2 Overall Estimate Summary

Category	Days	Description
Automated Migration (blog articles)	3-5	Bulk import ~350 blog articles using import scripts
Manual Migration (templates + pages)	40-55	Block development, templates, marketing pages, navigation
Integration Work	5-8	Analytics, consent, personalization replacement
QA & Testing	8-12	Cross-browser, responsive, accessibility, visual regression

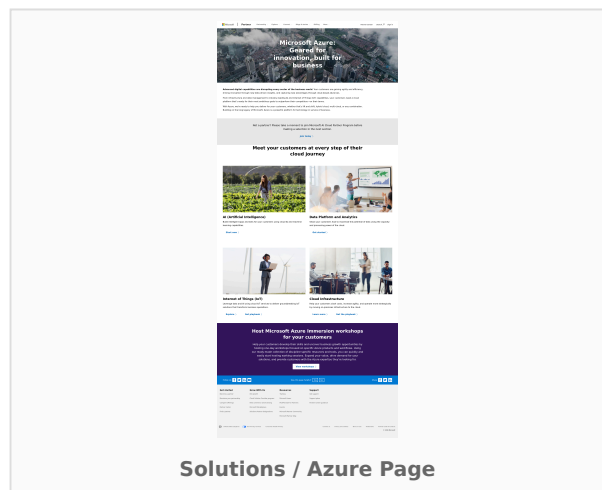

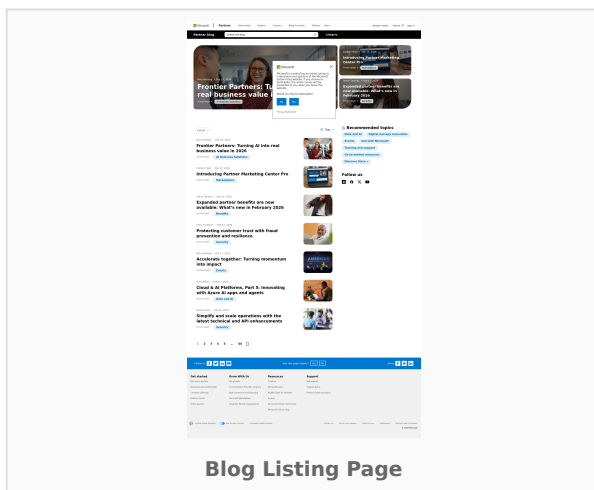

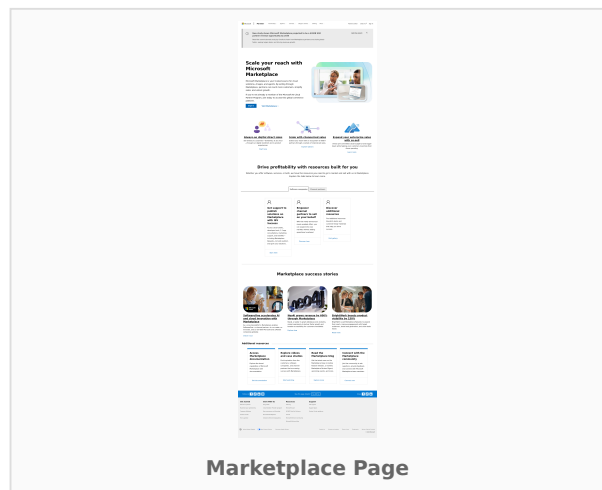

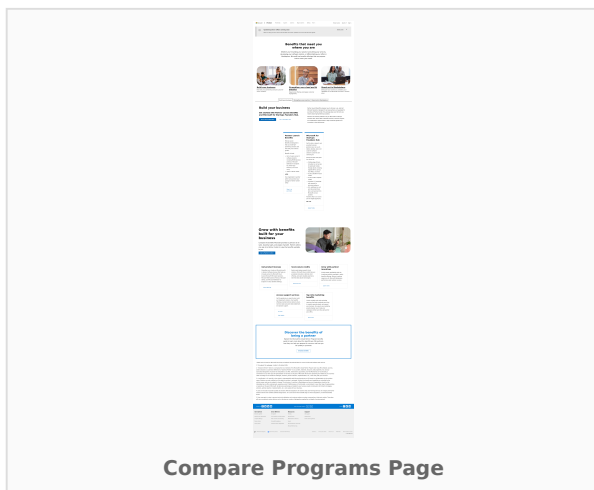

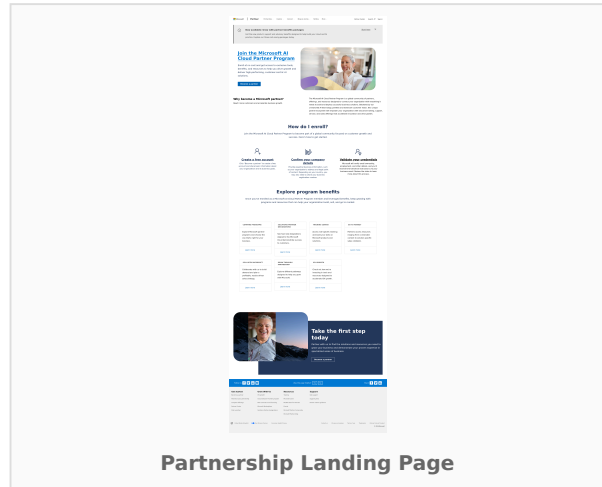

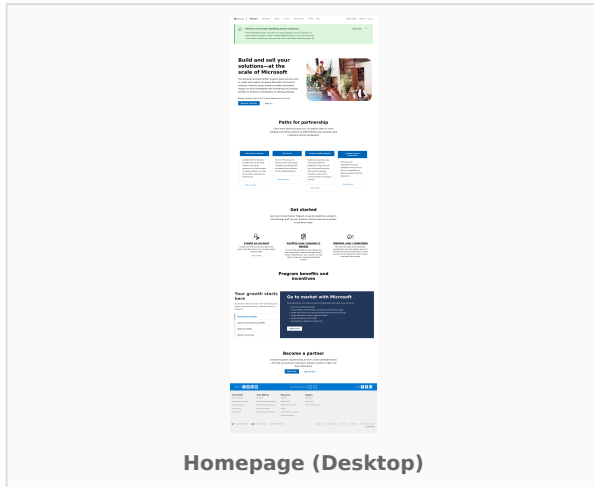

Category	Days	Description
TOTAL	56-80	~12-16 weeks with a small team (2-3 developers)

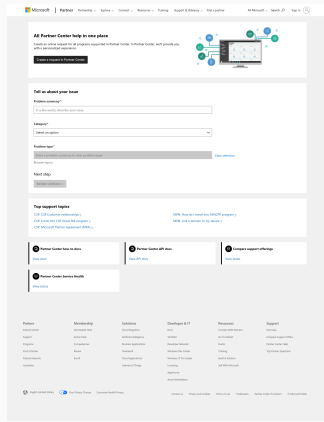

6.3 Assumptions & Caveats

- Partner Center portal (Dashboard, Support, Auth) is **excluded** from migration scope
- Training hub (skilling-hub.com) is **excluded** — external domain
- Estimates assume **en-US locale only**; multiply by locale count for full i18n
- Sitecore CDP personalization features require a **separate solution decision**
- Blog article content import assumes **consistent HTML structure** across articles
- Estimates assume Edge Delivery Services boilerplate blocks can be **extended** (not built entirely from scratch)
